I claim:

- 1. A cable railroad system, comprising:
- a load-bearing and traction cable;

a plurality of chairs mounted to coupling devices for selectively coupling said chairs to said load-bearing and traction cable;

said chairs having seats with electric heating devices, batteries connected to supply said heating devices with energy; and

devices for charging said batteries.

- 2. The cable railroad system according to claim 1, which further comprises control devices for controlling a heating of said seats.
- 3. The cable railroad system according to claim 2, wherein said control devices are disposed on said chairs.
- 4. The cable railroad system according to claim 1, which further comprises busbars disposed in stations of the cable railroad system and configured to charge said batteries during a garaging of said chairs.

- 5. The cable railroad system according to claim 1, which further comprises busbars disposed in stations of the cable railroad system and configured to charge said batteries during a movement of said chairs through the stations.
- 6. The cable railroad system according to claim 1, which comprises photovoltaic elements mounted to said chairs for charging up said batteries.
